

Delivering Person-Centred Care in Nursing (Transforming Nursing Practice Series)

Safe staffing is about having enough staff, who have the right values and skills, to deliver high quality care and support. It involves having safe staffing levels, recruiting the right people, and ensuring staff are competent and safe to do their role. We have resources to help.

The Adult Social Care Workforce Data Set is a free online data collection service that covers the adult social care workforce in England. The service helps over 20,000 care providers run their business and manage their staff training needs. It can also provide access to the Workforce Development Fund (WDF), a valuable source of funding for staff training.
