

Doing Statistical Mediation and Moderation (Methodology in the Social Sciences)

Mitchi1000% ,

I love using this app! Having the widget option is super convenient, and the cute fonts make it fun to use. I really like how this app is cute, without being overwhelming with too much bells and whistles. Also, the task states available are great!

Just one suggestion that I have, if possible, is to be able to put certain tasks (like daily tasks) on repeat. For example, if I have to "make breakfast before 10pm" everyday, I would like to put that to-do in repeat so that I don't have to write that same thing everyday when preparing for the next day. That would be super duper helpful!

Despite this though, using the app has been great! It's the first time I've stuck this long with a to-do app :D
