

Handbook of Applied Behavior Analysis

Degree Awarded: MS Applied Behavior Analysis

In addition to our normal on-ground program, we are also expanding into a virtual simulcast model and accepting students for remote practicums.

The Master's in Applied Behavior Analysis in the Arizona State Department of Psychology is changing the world for the people who need it most. Students will learn all the skills they need in order to help children and adults with autism spectrum disorders as well those with behavioral issues. The MS ABA in the Department of Psychology is a two-year program plus summer that meets or exceeds the BACB Fifth Edition Task List for coursework with over 345 classroom hours and more than 2000 hours of practicum experience.

This scientifically-based program is full-time and intensive; successful graduates will be able to sit for certification upon program completion and once certified, be eligible for state licensing. With licensure, alumni will have greater job potential and competitiveness to earn higher salaries in a field with an increasing demand for practitioners. Read ASU's Public Disclosure on Licensure Statement.

The Behavior Analyst Certification Board, Inc.® (BACB) has approved the program's course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

No other program in the country provides this level of practicum experience with classroom instruction at a top-tier, Research I university in a highly regarded Department of Psychology. Additionally, students will have experience in one of the fastest-growing markets in the country and have the opportunity to network through their practicum placements in the program.
