

The Collapse of Parenting: How We Hurt Our Kids When We Treat Them Like Grown-Ups

Every Tuesday, we publish four global Top 10 lists for films and TV: Film (English), TV (English), Film (Non-English), and TV (Non-English). These lists rank titles based on weekly: the total number of hours that our members around the world watched each title from Monday to Sunday of the previous week. We consider each season of a series and each film on their own, so you might see both Stranger Things seasons 2 and 3 in the Top 10. Because titles sometimes move in and out of the Top 10, we also show the total number of weeks that a season of a series or film has spent on the list. To give you a sense of what people are watching around the world, we also publish Top 10 lists for nearly 100 countries and territories (the same locations where there are Top 10 rows on Netflix). Country lists are also ranked based on hours viewed, but don't show country-level viewing directly. Finally, we provide a list of the Top 10 most popular Netflix films and TV overall (branded Netflix in any country) in each of the four categories based on the hours that each title was viewed during its first 28 days. Since some titles have multiple premiere dates, whether weekly or in parts, we count the 28 days from each episode premiere date in each country. This means that for Money Heist: Part 5, the total number of hours represents 28 days from the premiere of episodes 1-5 plus 28 days from the premiere of episodes 6-10. For titles that are Netflix branded in some countries but not others, we still include all of the hours viewed. All of the weekly lists and weeks in the Top 10 on the site start from June 28, 2021. Weekly reporting is rounded to 10,000 to account for any fluctuations in internet connectivity around the world. We engaged EY " an independent accounting firm " to review the weekly lists from July 6, 2021 to January 4, 2022. See report [here](#)
