

The NLN Jeffries Simulation Theory

INACSL believes that simulation and innovation transform lives. It is our mission to be the global leader in the art and science of healthcare simulation through excellence in nursing education, practice, and research. INACSL's core values are discovery, diversity and collaboration. Through discovery we create, uncover and develop to build capacity and influence. Through diversity strength grows from accepting the voices of all and extending equitable opportunities to others. Collaboration allows us to work inclusively and propels the success of our organization.

INACSL focuses on three themes or areas which we must excel in to achieve our vision and mission. These themes allow us to focus and align our goals and objectives as our organization evolves.

Vision

Simulation and innovation transform lives.

Mission

The global leader in the art and science of healthcare simulation through excellence in nursing education, practice, and research.

Core Values

DISCOVERY: Creating, uncovering, and developing to build capacity and influence

DIVERSITY: Strength grows from accepting the voices of all and extending equitable opportunities to others

COLLABORATION: Working inclusively propels success
