

## Writing Empirical Research Reports: A Basic Guide for Students of the Social and Behavioral Sciences

"I was very quiet...

...lacked confidence and did not mix with people well. I still am quiet and still find it difficult to communicate with people. However, since joining this site, my confidence has grown a tremendous amount. I have had work published , I have done a whole term in an English course and won an award for student of the year. All of this in little over a year. I believe this has been made possible through joining WDC and I hope it will continue for many more years." -sanita
