I felt defeated and the thought of retaking the test left me in fear. I began searching the internet for any program that could help me. After finding Study.com and watching the demo, I decided to purchase the program. For the first time in over a year, I feel excited and positive about my future. I thought I wasn't smart enough, but with the way Study.com breaks the subjects down, I feel encouraged. Words cannot explain how much help this program is to me right now. I believe the teachings for the courses I took excelled for me, mostly because it offered linguistic and visual learning, and being the way I am, I have an inflexible tendency to study as a result of my job. But because of study.com's flexibility, I'm able to do my study anywhere at any time without having to attend classes like regular school and actually go pass the limits that I had been given. Study.com has helped make it so you can take the quizzes right after you finish reading through the lessons, and look over them to see what you did wrong and retake them which is the right way to do it because it reinforces the mental fortitude to understand what was being done and what you need to work on, and helps prepare you for the final proctored exam. And those quizzes were well worth doing because it went over all the concepts I had needed to cover resulting in a passing grade. So yes, if you the kind of person to

review concepts and see where you can improve, on your own free will, then this is for you. Joshua A. Earned College Credit with College Accelerator
