

Functional may refer to:

In mathematics [edit]

Functional (mathematics), a term applied to certain scalar-valued functions in mathematics and computer science
Functional analysis
Linear functional, a type of functional often simply called a functional in the context of functional analysis

Higher-order function, also called a functional, a function that takes other functions as arguments

In computer science, software engineering [edit]

functional (C++), a header file in the C++ Standard Library

(C++), a header file in the C++ Standard Library
Functional design, a paradigm used to simplify the design of hardware and software devices

Functional model, a structured representation of functions, activities or processes in systems and software engineering

Functional programming, a programming paradigm based on mathematical functions rather than changes in variable states

In an ontology (information science), "functional" is a property or relation that can only hold a single value for a given individual
