

Forensic Psychology: Theory, research, policy and practice

1856-1989

Series reports the general and financial statistics of each school district located in the county. Information includes school district number and clerk's name; number of individuals within the district between ages 4 and 20; number of teachers employed; number of school houses (owned by the district); number of legal voters; number of libraries and books within each; number of private schools; cash on hand last at report; district tax received from county; state schools funds received; general value of school grounds and furnishings; property values; enrollment; number of students enrolled from outlying districts; school census; and board minutes. Series may also contain school attendance and grade reports and data on students and parents. Records may be titled School District Clerk Annual Report, District Clerk's Book of Records, District Clerk Record Book, or Oregon School Register and Record Book, which is the most comprehensive record of school district activities. School district records have been inventoried through 1965. Access to student records may be restricted by state or federal law.

The Willamette Heritage Center has an extensive finding aid documenting Marion County school districts. The finding aid includes a map showing the location of the 144 school districts, which existed in the county at one time. The finding aid also includes a table, which includes the number, name, and location of historic school districts as well as any relevant notations. A container list is included.

Records at the Oregon State Archives (Marion County Records):

School District Records [District Clerk's Record Book-District No. 36], 1913-1931 (4 volumes);
