

"Mister Haggin" was the sound that meant "God." In Jerry's heart and head, in the mysterious centre of all his activities that is called consciousness, the sound, "Mister Haggin," occupied the same place that "God" occupies in human consciousness.

The population of the island, Montgomery informed me, now numbered rather more than sixty of these strange creations of Moreau's art, not counting the smaller monstrosities which lived in the undergrowth and were without human form.

It was the prognostication of the philosopher who sees human thought, volatilized by the press, evaporating from the theocratic recipient.

Especially the human world, the human sea:--towards IT do I now throw out my golden angle-rod and say: Open up, thou human abyss!

Absolute continuity of motion is not comprehensible to the human mind.

I craved human companionship, and, coming off the poop, took my place by the side of the boatswain (a man whom I did not like) in a comparatively dry spot where at worst we had water only up to our knees.

But of recent years my understanding of human nature has become such that I realize that no normal healthy human would tolerate such performances did he or she know the terrible cruelty that lies behind them and makes them possible.

A hideous roar broke from his titanic lungs--a roar which ended in a long-drawn scream that is more human than the death-cry of a tortured woman--more human but more awesome.

As a curious chapter in the history of the human mind, its growth might be traced from Rousseau and St.

They were the productions of different minds and of adverse passions; one, ascending for the foundation of human government to the laws of nature and of God, written upon the heart of man; the other, resting upon the basis of human institutions, and prescriptive law, and colonial charter.

Bradley now realized the strategy that the pair had used to capture him and at once concluded that he was in the power of reasoning beings closely related to the human race if not actually of it.
