

## **Inclusion: The Politics of Difference in Medical Research (Chicago Studies in Practices of Meaning)**

Recognising our differences

Each individual in an organisation brings with them a diverse set of perspectives, work and life experiences, as well as religious and cultural differences.

The power of diversity can only be unleashed and its benefits reaped when we recognise these differences and learn to respect and value each individual irrelevant of their background.

At Global Diversity Practice, we help organisations to implement diversity policies that will help instil inclusion, respect and appreciation across the entire workforce.
