

## Research Methods in Psychology: Evaluating a World of Information

The tuition fee you pay depends on whether you are assessed as a 'Home' (UK), 'Islands' or 'International' student. In 2023/24 the fees for this course are:

Fee category Amount Home (UK students) Â£9,250\*

Foundation Year: TBA\*\* International Year 1 (2023/24): Â£14,300

Year 2 (2024/25): Â£14,700

Year 3 (2025/26): Â£15,100

Year 4 (2026/27): Â£15,500

For courses with a sandwich year, the fee for the placement year can be viewed on the undergraduate fees table. The placement fee published is for the relevant academic year stated in the table. This fee is subject to annual increases but will not increase by more than the fee caps as prescribed by the Office for Students or such other replacing body.

\* For full time programmes of a duration of more than one academic year, the published fee is an annual fee, payable each year, for the duration of the programme. Your annual tuition fees cover your first attempt at all of the modules necessary to complete that academic year. A re-study of any modules will incur additional charges calculated by the number of credits. Home tuition fees may be subject to annual increases but will not increase by more than the fee caps as prescribed by the Office for Students or such other replacing body. Full time taught international fees are subject to an annual increase and are published in advance for the full duration of the programme.

Eligible UK students can apply to the Government for a tuition loan, which is paid direct to the University. This has a low interest-rate which is charged from the time the first part of the loan is paid to the University until you have repaid it.

\*\* Foundation fees are awaiting the outcomes of the Government's 'Higher education policy statement and reform consultation'.
