

Statistics and Data Analysis for Nursing Research

[{"title": "Statistics | Definition, Types, & Importance | Britannica", "link": "https://www.britannica.com/science/statistics", "description": "statistics, the science of collecting, analyzing, presenting, and interpreting data. Governmental needs for census data as well as information about a variety of economic activities provided much of the early impetus for the field of statistics. Currently the need to turn the large amounts of data available in many applied fields into useful information has stimulated both theoretical and practical developments in statistics.", "pubDate": "Tue, 17 Jan 2023 18:17:00 GMT"}, {"title": "Statistics - Wikipedia", "link": "https://en.wikipedia.org/wiki/Statistics", "description": "Statistics is a mathematical body of science that pertains to the collection, analysis, interpretation or explanation, and presentation of data, or as a branch of mathematics. Some consider statistics to be a distinct mathematical science rather than a branch of mathematics.", "pubDate": "Tue, 17 Jan 2023 16:23:00 GMT"}, {"title": "Statistics Definitions, Types, Formulas & Applications - BYJUS", "link": "https://byjus.com/maths/statistics/", "description": "Summary statistics is a type of descriptive statistics, which is used to summarize the set of observations with large information as simply as possible. Statisticians used to describe the observation by finding the measures of central tendency, statistical dispersion, statistical dependence, and the shape of the distribution.", "pubDate": "Tue, 17 Jan 2023 15:33:00 GMT"}, {"title": "Statistics and Probability | Khan Academy", "link": "https://www.khanacademy.org/math/statistics-probability/", "description": "Statistics and probability 15,200 Mastery points available in course Course summary Analyzing categorical data Displaying and comparing quantitative data Summarizing quantitative data Modeling data distributions Exploring bivariate numerical data Study design Probability Counting, permutations, and combinations Random variables", "pubDate": "Wed, 18 Jan 2023 02:03:00 GMT"}, {"title": "U.S. Data and Statistics | USAGov", "link": "https://www.usa.gov/statistics", "description": "U.S. Census Data and Statistics. The United States Census Bureau provides data about the nation's people and economy. Every 10 years, it conducts the Population and Housing Census, in which every resident in the United States is counted. The agency also gathers data through more than 100 other surveys of households and businesses every one to five years.", "pubDate": "Tue, 17 Jan 2023 21:09:00 GMT"}, {"title": "What is Statistics? - University of California, Irvine", "link": "https://www.stat.uci.edu/what-is-statistics/", "description": "Statistics is the science concerned with developing and studying methods for collecting, analyzing, interpreting and presenting empirical data. Statistics is a highly interdisciplinary field; research in statistics finds applicability in virtually all scientific fields and research questions in the various scientific fields motivate the development of new statistical methods and theory.", "pubDate": "Sun, 08 Jan 2023 12:09:00 GMT"}, {"title": "APu00aeufe0e Statistics | College Statistics | Khan Academy", "link": "https://www.khanacademy.org/math/ap-statistics", "description": "Statistics for two categorical variables Exploring one-variable quantitative data: Displaying and describing 0/700 Mastery points Representing a quantitative variable with dot plots Representing a quantitative variable with histograms and stem plots Describing the distribution of a quantitative"}]
