

Pharmacology: Connections to Nursing Practice (3rd Edition)

We are gratified to announce the dates for the 3rd Edition of World Obesity and Weight Management Congress, which will take place in a hybrid form in Boston, Massachusetts, USA, and virtually from October 16-18, 2023, on a meaningful framework that guarantees meaningful interactions, engagement, and connection.

The congress will run on the theme "WEIGHT: Weighing Extraordinary Innovations and Gaining Honest Trends" and will provide insight from the world's leading specialists including the latest trends, new innovative preventive and treatment strategies, and cutting-edge research findings on all aspects of obesity and weight management.

This conference is a global forum for Obesity Professionals, and we assure you that you will gain knowledge from researchers from all over the world about the most up-to-date ways for obesity cure and therapy. The relationship between health and wealth, the impact of social media and stigmatization, globalization, and consumerism will all be addressed at this global summit along with the core causes of obesity. The congress assists you in learning how to create complete, personalized treatment plans for patients with complex adiposity-related diseases, such as chronic kidney disease, postpartum weight management, weight recovery after surgery, and depression or mental health issues associated with obesity.

The International Conference will be a three-day event that strives to provide a once-in-a-lifetime opportunity for conferencegoers to learn and make new connections through a high-quality scientific program that includes keynote speeches, poster presentations, workshops, discussions, and networking events. This is your finest opportunity to reach the largest assemblage of people from the obesity, weight management, and endocrinology community including researchers, scientists, surgeons, healthcare professionals, endocrinologists, nutritionists, fitness experts, pharmacists, clinicians, entrepreneurs, key players in the industry, government representatives, policymakers along with individuals from all over the world focused on learning about obesity and its implications.

We are raising awareness and enhancing knowledge of the root causes of obesity, as well as the initiatives that need to be taken to address them, and we hope that you will join us and contribute to this effort.
