

## Study Guide for Clayton's Basic Pharmacology for Nurses

Many of your study strategies—habits you have developed on and relied on over time—work great! Still, many students find when they start college or take on more challenging course material that some habits might need to be tweaked. Reflection is a powerful tool, and LSC is ready to help you delve into thinking about what study habits continue to work for you and what you might want to change — studying for college can be very different than studying in high school; you will be expected to not just memorize things, but to apply and evaluate information.

Below are some strategies you can explore and try out—see what works for you!
